Haelvoet

Furniture surrounding us with care

The dignity of people does not only depend on what they know, but also on what they still can. On the daily routines they can still carry out.
It is our goal to develop and create furniture and surroundings that enable people to live as independently as possible.
We want to care for people. That is why we pay the utmost attention to the tiniest detail during the development of our furniture. This is done with a clear understanding of the needs, a thorough knowledge of the challenges and a deep respect for society.
By doing so, we create an environment that cares about people.

We create *furniture...*
to heal, to care & to meet

TIME TO *care*

People want to be themselves and feel comfortable, especially in their own place. That is how people evolve from being into well-being.

Furniture should not only be functional, but also contribute to the atmosphere and character of the environment, so that people feel at home.

“I like the calm my room radiates. This is where I feel at home.”

TIME TO *meet*

People give energy to each other.
Contacts give strength.
Conversations give meaning.

Healthcare furniture has to stimulate meetings and make them more meaningful. In this way, people keep in touch with each other and the world.

TIME TO *heal*

Not only medical care helps people heal. An adapted environment can be healing too.

People have a higher chance of getting better in a place where they feel at ease. An environment that radiates warmth forms the basis of a faster recovery process.

THE WORLD *is a village*

More than anybody else, we realize that growth is the driving force of a production company. We continuously pursue this ambition, as long as this is not at the expense of our flexibility and philosophy. That is why we have two independent production units with their own features and markets. Our Belgian branch mainly concentrates on Western Europe and further export markets, whereas our Romanian production unit is active in Central and Eastern Europe.

To strengthen our established reputation, we have a worldwide network of official partners. These distributors have been carefully selected on the basis of their professionalism and their competent after-sales service. Our partners regularly attend extra training courses, and are always kept up-to-date with our company know-how.

Tradition

Long before the concepts of “Healing Environment” and “Evidence-Based Healthcare Design” became widely known and accepted, design and atmosphere were already important strategic pillars within our family company. The first pieces of medical furniture originated in 1931 from the unflagging energy of a man that exactly knew how to combine creativity with innovation.

The current managing director, grandson of the company founder, remains loyal to the principles that have proved to be successful for already more than 80 years. The company’s rich history and enthusiastic spirit are the ideal incentives to create unique furniture that keeps the balance between design, quality and functionality.

In particular, our products are a means of forming a lasting partnership with you, the future of our company. We sincerely hope to be your loyal future partner, so that we can continue to write history…together.

Craftsmanship

The perfect combination of quality, innovation and flexibility is not an unattainable ideal for us. On the contrary, it results from a well-considered strategy and an enviable perseverance.

Few people have the courage and energy to maintain a vertically-integrated production unit. Many entrepreneurs and investors still prefer short-term profits to an uncertain future.

Ethical entrepreneurship

Our people make products for people. It is for this reason that ethical entrepreneurship plays a key role in our corporate policy. The protection of the environment, too, was already a well-considered choice of our management, long before it became a trendy concept. Our PEFC and environmental certificate, as well as our recyclable materials, modern environment-friendly production processes and ecological design philosophy bear witness to this.

After all, protecting the environment is protecting our future.

Our company is the proud owner of an ISO certificate. This means that our company guarantees you high-quality products and an outstanding after-sales service. Our product and quality requirements even surpass the standards required by the medical device directive. Haelvoet products are excellent investment goods and will serve you perfectly for many years. Thanks to its longer lifespan, a choice for a Haelvoet product is a choice for a durable investment.

Safety has no price. Our high/low Care and Hospital beds were tested thoroughly by TÜV SÜD, a German Inspection Association, and received a TÜV certificate. Getting a TÜV certificate means that the tested products comply with all applicable European norms. This certification is an important step in our continuous aim to offer safe and high-quality products.

Innovation

The combination of innovation and tradition - two seemingly incompatible concepts - makes our furniture so special. We always use the newest and most advanced technologies, without forgetting our tradition of quality for the benefit of our customers.

YOUR FUTURE
our concern

Haelvoet pursues the same goals as you do. A liveable world for the next generations. This is a continuous search for the right balance between people, environment and entrepreneurship. Production processes and deliveries have to be as efficient as possible, whereas resources are deployed respectfully. Thanks to this approach, choosing Haelvoet is choosing an honest product.

PROFIT
Profit

A positive cash flow in a commercial company such as Haelvoet is the foundation for continuity. To realise durable growth, Haelvoet is exploring new markets and continues to invest in production and infrastructure.

PEOPLE
People

Haelvoet cares for people. Not only our products surround the users with care. Our employees, too, enjoy a positive and stimulating social policy and work climate. Haelvoet even goes one step further and wants to participate actively in local communities and contribute to valuable social initiatives.

The Romanian production unit of Haelvoet supports a local orphanage and psychiatric institute on a regular basis. Both organizations get an annual budget they can spend as they see fit. The orphanage is building its own sports centre and buys toys for the littlest ones. The psychiatric institute prefers to spend its budget on infrastructure, food and clothing.

PLANET
Planet

Haelvoet aims at limiting the environmental impact caused by its activities as much as possible. Simultaneously, a healthy balance between ecology and economy is kept in mind. Haelvoet therefore uses wood of sustainably managed forests and is the proud owner of a PEFC and environmental certificate. Furthermore, the emission of CO2 during the production process has been reduced to an absolute minimum. Our production processes are re-evaluated on a regular basis.

During the production process an efficient waste management is applied to limit the amount of production waste. Thanks to this, most of the waste is used again in new products.

Haelvoet strives for durable growth without forgetting its social and ecological responsibility.
