

Polyclinique Les Jasmins

Tunis (Tunisia)

Polyclinique Les Jasmins is a medical and surgical center located in the heart of the city. The Polyclinic has an emergency department, a medical imaging center, a laboratory and a day hospital. Its architecture and organization are designed to treat patients in a spirit of efficiency, quality and safety.

“We opted for single and double rooms and even suites because our biggest challenge, besides that of the quality of care, is the accommodation of our patients in the best possible conditions,” said Dr. Ouafi Marrakchi, the chairman of the board of directors of the polyclinic. Haelvoet provided the rooms, the emergency department and the medical day case suites with comfortable furniture. The rooms were furnished with Siena Hospital beds, Fero relax chairs and Advance bedside tables. The emergency services use our high/low Vico stretchers.
